Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 19-21, 28, 32 and 33 are rejected under 35 U.S.C. 102(b) as being anticipated by Faher (6,260,278).

Fasher discloses the invention including a cutting head housing 100, a cutter means/rotatable cutter line 34, an elongate shaft 22, connection means 50, a hand-grippable portion 16, an effective rotation (see col. 6, line 63-64) and an axis of rotation (see Fig. 5).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 22-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Faher (6,260,278).

Faher discloses the invention substantially as claimed including a motor 20. Faher does not show a ball-and-socket joint. It would have been obvious to one having ordinary skill in the

Art Unit: 3724

art at the time the invention was made to have modified Faher's joint, since the examiner takes Official Notice of the equivalence of upper and lower housings (52 and 60) and a ball-and-socket joint for their use in the joint connection art and the selection of any of these known equivalents to provide adjustment mechanisms to change the orientation of the cutting head would be within the level of ordinary skill in the art.

5. Claims 29- 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Faher (6,260,278) in view of Wagster et al. (5,325,928).

Faher discloses the invention substantially as claimed except for a wheel. However, Wagster teaches the use of a wheel 30 for the purpose of improving the stability of the trimmer device. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Faher's device by providing the wheel as taught by Wagster in order to improve the stability of the trimmer device.

Allowable Subject Matter

6. Claims 26-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Berdan, Bassett, Wright, Jerez and Rogala are cited to show related device.
